REVIEW OF PUBLIC ASSISTANCE

Since the end of the war, public assistance caseloads in Montana, as well as nationally, have shown a constant increase despite the continued high level of economic activity. Of the four financial aid programs administered by the Montana Department of Public Welfare, Old Age Assistance, the largest program, has increased by only 2% from August 1945 to April 1948. The present caseload of 10,908 recipients is only 229 greater than the caseload at the end of the war. Payments to recipients of Old Age Assistance, however, have increased by 29%, from \$336,077 in August 1945 to \$432,313 for April 1948. The average payment for this type of assistance is currently \$39.63 and represents an increase of 26% over the average of \$31.47 for August 1945. It appears that the average payment for Old Age Assistance has nearly reached its upper limit under present budgetary standards and maximum restrictions.

The largest increases have occurred in the Aid to Dependent Children program. The number of families receiving this type of aid has grown from 1,258 to 1,935 (54%). Similarly, the number of children has increased from 3,190 to 5,102 (60%). Total payments under this category amounted to \$137,910 for April 1948 as compared with \$59,219 for August 1945. Average payments per family and per child have increased by 51% and 46%, respectively, and are presently at \$71.22 per family and \$27.03 per child.

Aid to Needy Blind, the smallest financial aid program administered by the Department, has increased from 323 to 438 recipients during the post-war period. Total payments have increased by 61% from \$11,245 in August 1945 to \$18,071 in April 1948. The average payment for Aid to Needy Blind has grown from \$34.81 to \$41.26, an increase of 19%.

Expenditures from county funds for medical care and hospitalization have almost doubled from August 1945 to the present. Not only has there been a substantial increase in the number of recipients of this aid but also there has been a marked increase in medical and hospital rates. During the period, the average expenditure for hospitalization has increased from \$57.90 to \$85.12 per recipient, and the number of recipients has grown from 270 to 516. During April 1948, medical care was provided to 469 recipients at an average cost of \$15.43 whereas in August 1945 the number of recipients was only 231 and the average expenditure \$12.33.

The number of cases receiving General Relief subsistence (cash and disbursing orders) has increased from 967 to 1,435 or 48%. Expenditures for General Relief have climbed from \$23,717 to the current expenditure of \$38,348 and the average grant per case has increased from \$24.53 to \$26.72.

The first part of the report deals with the general situation of the country. It is a very interesting and informative study of the country's development. The author has done a great deal of research and has gathered a wealth of material. The report is well written and is a valuable contribution to the study of the country's development.

The second part of the report deals with the economic situation of the country. It is a very interesting and informative study of the country's economic development. The author has done a great deal of research and has gathered a wealth of material. The report is well written and is a valuable contribution to the study of the country's economic development.

The third part of the report deals with the social situation of the country. It is a very interesting and informative study of the country's social development. The author has done a great deal of research and has gathered a wealth of material. The report is well written and is a valuable contribution to the study of the country's social development.

The fourth part of the report deals with the political situation of the country. It is a very interesting and informative study of the country's political development. The author has done a great deal of research and has gathered a wealth of material. The report is well written and is a valuable contribution to the study of the country's political development.
